Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Animal escape, Inadequate PPE	3H	<ul style="list-style-type: none"> - Ensure all PPE such as gloves, helmets, and boots are available and worn appropriately. - Check enclosures for secure locks and functionality. - Conduct team briefing on protocols and contingency plan. - Ensure emergency contacts and first aid kits are accessible. # Restrict non-essential personnel from the handling area. - Check all equipment for operational safety. - Confirm that all personnel are trained and competent in handling tasks. - Establish a communication plan during handling. - Ensure all animal identification and handling plans are verified. # Schedule activity during daylight for optimal visibility. - Inspect surrounding areas for potential hazards 	2M
2. Initial Approach	Unexpected animal behaviour, Personal Injury	3H	<ul style="list-style-type: none"> - Approach animals calmly and quietly to avoid startling them. - Do not isolate or corner animals in enclosures. - Ensure all handlers are experienced and knowledgeable of animal behaviour. - Use verbal cues consistently when moving towards animals. - Maintain safe distances until behaviour is assessed. - Allow animals adequate time to acclimatise. - Use appropriate equipment such as snares or poles if necessary. - Have emergency response plan ready to execute - Confirm that handling areas are free of tripping hazards. # Monitor for signs of aggression or distress - Use barriers if necessary for additional safety 	2M
3. Capture and Restraint	Biting or scratching, Musculoskeletal Injury	4A	<ul style="list-style-type: none"> - Use approved capture and restraint equipment. - Minimise handling time to reduce stress on the animal. - Ensure all handlers have undergone restraint training. - Recheck restraints regularly for security during use. - Engage additional handlers if animal weight is significant. - Use sedatives as required following veterinary approval. 	2M
