Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before the task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	animal stress, improper PPE	3H	<ul style="list-style-type: none"> - Wear appropriate PPE including gloves and eye protection - Ensure first aid kit is fully stocked and accessible - Identify specific risks associated with the animal species - Brief team on handling procedures and emergency contacts - Ensure a clear workspace to avoid trips and falls - Confirm availability of veterinary support if needed - Limit noise and sudden movements to prevent animal stress - Use appropriate barriers or equipment to restrain the animal - Ensure all staff are appropriately trained in handling - Review and understand relevant species-specific first aid procedures 	2M
2. Approaching the Animal	animal aggression, biting, scratching	4H	<ul style="list-style-type: none"> - Approach the animal slowly and calmly - Speak softly to avoid startling the animal - Use appropriate tools for restraint like snares or nets - Maintain a safe distance until the animal is calm - Wear protective clothing including long sleeves - Use animal-specific restraints where necessary - Ensure only trained personnel handle aggressive animals - Have a buddy system to assist if needed - Utilize sedatives if prescribed by a vet - Keep escape routes clear for safety 	3H
3. Assessing the Animal	misdiagnosis, physical injury	3H	<ul style="list-style-type: none"> - Conduct a visual assessment to determine injuries - Use appropriate lighting for thorough examination - Consult species-specific health guidelines - Have a checklist to cover all assessment points - Involve a veterinarian for complex cases - Wear gloves to protect against zoonotic diseases - Avoid making assumptions without proper evidence - Ensure animal remains calm to avoid additional stress 	2M
