								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips and trips, Manual handling	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify and remove trip hazards - Ensure clear access to and from the work area - Use proper manual handling techniques and provide training - Set up equipment according to manufacturer's instructions - Ensure proper lighting in the workspace - Wear appropriate PPE including safety shoes - Regularly clean and maintain work area - Implement housekeeping protocols - Train workers on trip hazard identification - Post signage to indicate wet floors 	2M
2. Equipment Setup	Electrical hazards, Struck by objects	4H	<ul style="list-style-type: none"> - Check all electrical outlets and cords for damage before use - Ensure all equipment is grounded and compliant with Australian standards - Use lockout/tag-out procedures during equipment setup - Follow manufacturer's guidelines for equipment setup - Place equipment on a stable, level surface - Conduct a test run of the equipment to ensure proper functioning - Ensure all guards and covers are in place before starting work - Wear PPE such as gloves and eye protection - Train workers in equipment setup procedures - Have emergency stop procedures in place 	3H
3. Loading Material	Manual handling, Cuts from sharp edges	3H	<ul style="list-style-type: none"> - Use mechanical aids such as hoists or trolleys where possible - Train employees on lifting techniques to prevent injury - Ensure materials are stored and stacked properly - Wear cut-resistant gloves when handling sharp materials - Keep the area around the machine clear to avoid tripping - Implement 'buddy system' for loading heavy materials - Inspect materials for defects before use - Provide training on hazard identification and control methods 	2M
