Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
Consequence Scale:								4. Engineering	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation		5. Administrative		
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution		6. PPE		
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage		Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.		
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment		<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>		
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slippery surfaces, poor lighting	3H	<ul style="list-style-type: none"> - Ensure proper footwear is worn to prevent slips - Improve lighting with additional light fixtures - Clean and dry surfaces regularly - Place signage to warn of slippery areas if necessary - Conduct regular inspections to assess risk - Install non-slip flooring where possible - Provide training on safe walking practices - Use temporary barriers and warning areas - Encourage immediate reporting of slips - Assign responsibility for routine cleaning tasks 	2M
2. Check Equipment	equipment malfunction, electrical shock	3H	<ul style="list-style-type: none"> - Perform regular maintenance checks on ovens - Inspect all electrical cords and connections for damage - Ensure that only authorised personnel handle equipment - Implement a schedule for equipment inspections - Use residual current devices for electrical safety - Provide training on identifying faulty equipment - Keep a documented log of all maintenance activities - Label and remove defective equipment from service promptly - Test emergency stop features for functionality - Encourage staff to report any signs of equipment failure 	2M
3. Load Ingredients	muscle strain, burns	3H	<ul style="list-style-type: none"> - Train staff on correct lifting techniques - Use mechanical aids for heavy lifting when available - Provide heat-resistant gloves to prevent burns - Reduce ingredient load size to manageable amounts - Arrange workspace to minimise awkward postures - Implement regular breaks to avoid fatigue - Install shelving at appropriate heights - Enforce strict 'no running' policy in operational areas 	1L
