

Blocking Off Wastes Pipe Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	manual handling, slip/trip	3H	<ul style="list-style-type: none"> - Perform a site risk assessment prior to commencement - Use appropriate lighting to ensure clear visibility - Communicate task plan with the team - Arrange for appropriate permits and documentation - Inspect area for tripping hazards and remove where possible - Ensure proper training on handling heavy tools - Use personal protective equipment (PPE) such as gloves and safety boots - Allocate sufficient manpower to handle tools safely - Designate a clear area for equipment setup - Provide proper signage indicating work area 	2M
2. Identify Pipe	incorrect identification, chemical exposure	3H	<ul style="list-style-type: none"> - Confirm pipe identity using schematics and tags - Use non-destructive testing methods for confirmation - Limit chemical exposure with appropriate PPE (gloves, goggles) - Consult with a knowledgeable supervisor or engineer for confirmation - Conduct a safety brief specific to chemical hazards - Maintain a safe distance from questionable pipes until officially identified - Ensure all staff understand pipeline schematics and tagging systems - Have an emergency wash station easily accessible - Regularly test PPE to ensure it's functioning properly - Develop a checklist for pipe identification 	1L
3. Shut-off Valves	high pressure release, incorrect valve operation	4A	<ul style="list-style-type: none"> - Work closely with licensed personnel to confirm shut-off procedures - Label valves clearly for accurate identification - Use pressure-relief devices when operating under pressure - Operate valves slowly to mitigate sudden pressure changes - Conduct regular inspection of valve functioning and maintenance - Continuous training on valve operation and emergency response - Follow a step-by-step guide during valve shut-off - Ensure communication devices are working and in use during operation 	2M

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
