Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Fire start, Gas leak	3H	<ul style="list-style-type: none"> - Perform a site-specific risk assessment - Ensure all personnel are trained in blowtorch safety - Check for gas leaks before use - Remove all flammable materials from the work area - Ensure fire extinguishers are nearby and functional - Check blowtorch and connections for damage - Secure appropriate PPE including gloves and eye protection - Post safety signage in the area - Limit access to authorized personnel only - Establish a clear communication plan for emergencies 	2M
2. Connecting Gas Cylinder	Gas leakage, Explosion	3H	<ul style="list-style-type: none"> - Inspect gas cylinder and connections for damage - Use approved regulator and fittings - Ensure proper seal by checking for hissing sounds - Use soapy water to test connections for leaks - Avoid dropping or dragging cylinders - Secure the cylinder in an upright position - Ensure adequate ventilation in the area - Keep away from ignition sources - Check expiry date of the cylinder - Follow manufacturer instructions for connection 	2M
3. Ignition	Sudden flare, Burns	3H	<ul style="list-style-type: none"> - Use a proper gas lighter intended for blowtorches - Stand to the side when igniting - Keep face and body away from the flame path - Ignite in an open, ventilated area - Wear flame-resistant clothing - Ensure flame control valve is operative - Always have a fire blanket ready - Maintain a safe distance from others 	2M

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
