Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Muscle strain, Slippery surface	3H	<ul style="list-style-type: none"> - Ensure floor surface is clean and dry - Use anti-slip mats in work area - Conduct a toolbox talk to cover proper lifting techniques - Provide appropriate personal protective equipment (PPE) such as gloves and safety shoes - Inspect all tools and equipment for good working condition - Clearly mark any potential tripping hazards - Ensure adequate lighting in work area - Limit the number of personnel in the area to minimise congestion - Install ergonomic tools for lifting tasks - Rotate staff regularly to prevent muscle fatigue 	2M
2. Review Manual	Eye strain, Paper cuts	2L	<ul style="list-style-type: none"> - Provide digital copies to reduce the risk of paper cuts - Encourage regular breaks to prevent eye strain - Provide proper lighting for reading activities - Supply reading stands to avoid awkward postures - Use magnifying glass for smaller text - Ensure clean work surfaces to prevent repeated handling of documents - Provide stylus pens for interactive devices - Encourage use of adjustable chairs to maintain good posture - Set screen brightness to comfortable levels - Offer blue light filtering glasses if digital screens are used 	1L
3. Locate Fuel Injectors	Confined space, Chemical exposure	3H	<ul style="list-style-type: none"> - Conduct hazard assessment for confined spaces - Use gas detectors to monitor air quality - Provide training on confined space entry - Use PPE such as gloves, goggles, and respirators - Limit exposure time to hazardous chemicals - Ensure a buddy system is in place - Provide clear entry and exit points - Set up ventilation systems to reduce fume concentration 	2M
