

Chemicals Spills And Leaks Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE			Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE			Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE			Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH			Administrative Change	
						1L LOW	Monitor and keep records.	PPE	

Risk Rating & Required Action:

4A	Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.
3H	Review and approve additional controls before task starts. Senior supervisor sign-off needed.
2M	Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.
1L	Proceed, following standard operating procedures. Monitor and keep records.

Consequence Scale:

Consequence	People (injury/illness)	Project / Assets	Compliance / Reputation
Catastrophic	Fatality or permanent total disability	project shutdown	Significant regulator intervention; criminal prosecution
Major	Serious injury/illness (hospital > 5 days)	critical delay	Improvement notice; major media coverage
Moderate	Medical-treatment injury; lost-time > 1 day	moderate delay	Minor breach; adverse client comment
Minor	First-aid only, no lost time	negligible delay	Isolated non-conformance
Insignificant	No injury	no schedule impact	Deviation caught and corrected on site

Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

- Eliminate
- Substitute
- Isolate
- Engineering
- Administrative
- PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Chemical exposure, Inhalation risk	3H	<ul style="list-style-type: none"> - Conduct a pre-operational safety meeting. - Ensure the availability of the Safety Data Sheet (SDS). - Verify all personnel have completed relevant safety training. - Confirm the presence and use of appropriate personal protective equipment (PPE). - Check the adequacy of ventilation systems. - Implement a buddy system for high-risk areas. - Mark and label chemical storage clearly. - Designate spill kits and emergency equipment locations. - Limit access to authorized personnel only. - Conduct regular safety audits. 	2M
2. Chemical Storage Management	Storage spill, Chemical reaction	4H	<ul style="list-style-type: none"> - Store chemicals according to compatibility and SDS guidelines. - Inspect containers regularly for leaks or damage. - Install secondary containment systems. - Use proper shelving ensuring they are labelled and stable. - Separate strong acids and bases storage. - Rotate stock to ensure older chemicals are used first. - Implement a maximum stock level policy. - Regularly review and update the chemical inventory list. - Implement clear communication during transfers. - Keep aisles free of obstruction for quick access. 	3H
3. Chemical Handling	Skin contact, Accidental ingestion	3H	<ul style="list-style-type: none"> - Utilize PPE including gloves, goggles, and aprons. - Wash hands thoroughly after handling chemicals. - Prohibit eating or drinking in chemical areas. - Use tongs or tools to handle hazardous chemicals when feasible. - Secure lids on containers promptly after use. - Attend handling training sessions regularly. - Label and manage chemical waste correctly. - Use fume hoods when handling volatile substances. 	2M

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
