Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Site Inspection	Uneven surfaces, Obstructed pathways	3H	<ul style="list-style-type: none"> - Conduct a comprehensive site survey to identify potential hazards - Mark and barricade uneven surfaces and obstructed pathways - Maintain clear signage for identified hazards - Provide appropriate PPE for workers during inspection - Schedule regular site inspections throughout the project - Ensure adequate lighting on site for visibility - Supervise inexperienced staff during site assessments - Document inspection findings and actions taken - Train staff on hazard identification and site-specific risks - Regularly update risk assessments based on site conditions 	2M
2. Permit Acquisition	Incorrect documentation, Delay in approvals	4M	<ul style="list-style-type: none"> - Complete a checklist of necessary permits and licenses - Designate a responsible person for managing permits - Conduct a training session on compliance requirements - Regularly update a calendar for permit renewals and deadlines - Liaise with authorities to confirm required documentation - Provide detailed project plans to relevant authorities - Follow-up regularly on permit application statuses - Maintain records of communication with authorities - Use templates for standard document preparation - Plan project timelines to accommodate permit processing 	2M
3. Materials Delivery	Traffic congestion, Manual handling injuries	3H	<ul style="list-style-type: none"> - Schedule deliveries during off-peak traffic times - Plan delivery routes to minimise disruption - Use mechanical aids for heavy lifting when unloading materials - Brief drivers on site-specific safety protocols - Assign a traffic warden to manage on-site vehicles - Provide manual handling training to all workers - Clearly mark delivery zones to avoid accidents - Inspect materials upon delivery for safety compliance 	2M
