Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Manual handling injuries, Slips and trips	3H	<ul style="list-style-type: none"> - Conduct a site inspection prior to work. - Ensure the area is free of obstructions and slippery conditions. - Train workers in proper manual handling techniques. - Use mechanical aids for lifting heavy materials. - Wear suitable footwear with non-slip soles. - Clearly mark work areas with hazard tape. - Ensure adequate lighting. - Ensure team communication via hand signals or radios. - Perform stretching exercises before starting work. - Assign tasks according to individual capabilities. 	2M
2. Setting up Equipment	Electrical shock, Equipment failure	4H	<ul style="list-style-type: none"> - Inspect all electrical tools and connections prior to use. - Use equipment in accordance with manufacturer instructions. - Ensure equipment is tagged and tested regularly. - Only qualified personnel should set up electrical equipment. - Use residual current devices (RCDs) for all power tools. - Ensure equipment is placed on stable surfaces. - Conduct pre-start checks on all machinery. - Report faulty equipment immediately. - Use non-conductive ladders where necessary. - Provide induction training for all new equipment. 	2M
3. Drilling Operation	Flying debris, Noise exposure	3H	<ul style="list-style-type: none"> - Conduct a pre-drill inspection to identify all hazards. - Use appropriate personal protective equipment (PPE), including safety goggles and helmets. - Ensure all workers understand emergency procedures. - Operate machinery within the specified limits to reduce vibrations. - Maintain a safe distance from the rotating machinery. - Use dust suppression measures to limit airborne particles. - Regular breaks to prevent fatigue-related errors. - Monitor noise levels and use hearing protection where necessary. 	2M
