								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

1. Preparation	Insufficient planning, Inadequate resources	3H	<ul style="list-style-type: none"> - Conduct a pre-job briefing with all involved personnel - Review safety procedures and ensure all equipment is available - Assign roles and responsibilities clearly - Confirm availability of personal protective equipment - Ensure emergency procedures are in place and understood - Conduct a site-specific risk assessment - Confirm the availability of first aid and emergency contacts - Liaise with relevant authorities if necessary - Verify all personnel are trained and competent - Ensure all tools and equipment are in good working condition 	2M
2. Gathering Equipment	Injury from lifting heavy tools, Using faulty equipment	3H	<ul style="list-style-type: none"> - Use mechanical aids to lift heavy equipment - Conduct regular checks and maintenance of tools - Ensure all equipment is tagged and tested - Make use of personal protective gear when handling equipment - Store equipment properly to avoid tripping hazards - Replace faulty equipment immediately - Keep walkways clear of obstructions - Train workers on proper lifting techniques - Have a maintenance log for equipment inspections - Verify electrical tools are properly insulated 	2M
3. Site Inspection	Site hazards unrecognized, Slips, trips and falls	3H	<ul style="list-style-type: none"> - Perform a thorough walk-through of the worksite - Identify and document all potential site hazards - Place appropriate signage where necessary - Ensure all areas are well-lit - Use barriers to section off dangerous zones - Keep work areas tidy and uncluttered - Provide slip-resistant flooring where applicable - Ensure pathways are marked and visible 	1L
