Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	manual handling injury, exposure to sharp edges	3H	<ul style="list-style-type: none"> - Conduct a pre-task safety briefing to discuss potential hazards - Ensure correct PPE is worn including gloves and protective eyewear - Use mechanical aids to transport materials when possible - Ensure proper lighting in the work area - Keep the work area tidy to prevent trips and falls - Ensure first aid kits are easily accessible - Provide instruction on safe manual handling techniques - Limit the weight of loads lifted manually to safe levels - Inspect all tools and equipment for damage before use - Ensure workers are trained and competent for the task 	2M
2. Material Inspection	contact with defective materials, pinch points	3H	<ul style="list-style-type: none"> - Inspect all tools for defects before use - Wear gloves to handle materials - Remove any defective materials from the work area immediately - Store materials safely to prevent them from rolling or falling - Implement SOP for material handling - Use barriers to separate any defective stock - Conduct regular audits of materials - Utilise bonding racks to hold materials safely - Communicate clearly any defects found to the team - Ensure pinch points on equipment are covered or guarded 	1L
3. Tool Setup	incorrect use of tools, electric shock	4A	<ul style="list-style-type: none"> - Ensure all tools are correctly rated and inspected for electrical safety - Provide training on correct tool usage - Display warning signs around electrical hazards - Test and tag all electrical equipment regularly - Implement a Lockout/Tagout (LOTO) procedure for malfunctioning tools - Maintain a log of tool inspection - Use tools only for their intended purpose - Provide insulated equipment where necessary 	2M
