								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Improper setup, Unsecured equipment	4A	<ul style="list-style-type: none"> - Conduct a site assessment to identify potential hazards - Secure all equipment using approved methods - Verify that all operators are appropriately trained - Ensure communication devices are functional - Confirm no obstacles in the work area - Brief all staff on safety procedures - Check weather conditions and adjust plans accordingly - Select appropriate personal protective equipment (PPE) - Allocate responsibilities amongst team members - Establish emergency procedures 	3H
2. Equipment Inspection	Mechanical failure, Missing safety features	3M	<ul style="list-style-type: none"> - Regular maintenance and inspection scheduled for all equipment - Check for wear and tear on moving parts - Verify safety guards are in place and functional - Document inspection findings - Isolate faulty equipment immediately - Use qualified personnel for inspections - Maintain a spare parts inventory - Ensure all equipment complies with Australian safety standards - Utilise checklists for comprehensive inspections - Assign accountability for inspection processes 	2M
3. Operator Training	Inadequate training, Incorrect operation	3H	<ul style="list-style-type: none"> - Provide comprehensive training before operation - Conduct regular refresher courses - Simulate emergency scenarios for practice - Monitor performance and correct errors - Ensure trainers are qualified - Maintain training records for all operators - Implement a buddy system during initial operations - Encourage operators to ask questions 	1L
