

Cumulative Exposure To Vibration Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE			Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE			Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE			Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH			Administrative Change	
						1L LOW	Monitor and keep records.	PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Inadequate training, Lack of awareness	3H	<ul style="list-style-type: none"> - Conduct thorough training programs on equipment usage - Provide comprehensive induction highlighting risks of vibration - Ensure constant supervision and mentoring for new workers - Develop a clear communication plan regarding specific hazards - Use visual aids and signage to depict potential hazards - Conduct pre-task briefings focusing on current risks - Implement quizzes to ascertain understanding of vibration risks - Ensure easy access to training materials - Provide frequent refreshers and updates on risk management practices - Regularly review and update training content 	2M
2. Selecting Equipment	Selecting inappropriate tools, Faulty equipment	4H	<ul style="list-style-type: none"> - Assess the task requirement thoroughly before selecting tools - Ensure all equipment has undergone recent safety compliance checks - Choose equipment designed to minimise vibration exposure - Maintain an inventory of compliance-checked tools and equipment - Instruct workers on selecting the correct equipment for each job - Regularly inspect equipment for faults - Implement a tagging system for faulty equipment - Provide feedback channels for workers to report tool inefficiencies - Ensure all equipment is serviced as per manufacturer guidelines - Develop a checklist for equipment pre-use inspection 	2M
3. Setting Up Work Area	Poor setup leading to vibration transmission, Unsuitable surface	3H	<ul style="list-style-type: none"> - Assess and prepare surface condition suitable for operation - Implement damping methods to absorb vibrations - Position equipment to reduce transmission of vibrations - Use anti-vibration foundations or mounts where applicable - Ensure workspace is ergonomically arranged - Provide instruction on setting up anti-vibration positioning - Remove any unnecessary objects from the work vicinity - Ensure adequate lighting to reduce setup errors 	2M

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
