Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

1. Preparation	Manual handling injuries, Exposure to dust	3H	<ul style="list-style-type: none"> - Conduct a risk assessment before starting work - Ensure workers are trained in proper lifting techniques - Provide protective equipment such as gloves and mask - Keep work area clean and free of hazards - Implement a dust control system - Use mechanical aids for lifting heavy items - Schedule regular breaks to avoid fatigue - Monitor air quality regularly - Provide health surveillance for workers - Enforce correct posture and work stretching exercises 	1L
2. Material Handling	Crush injuries, Strains	3H	<ul style="list-style-type: none"> - Use forklifts and trolleys for transporting heavy materials - Train workers on safe handling techniques - Use proper lifting for large pieces - Keep pathways clear of obstructions - Ensure materials are securely stacked - Label heavy items clearly - Supervise tasks involving heavy lifting - Conduct regular equipment maintenance - Wear appropriate personal protective equipment (PPE) - Limit the lifting of materials over shoulder height 	2M
3. Equipment Setup	Cuts from tools, Electrical hazards	3H	<ul style="list-style-type: none"> - Ensure all tools are in good condition and fit for purpose - Conduct pre-use inspections of electrical equipment - Provide training on equipment use - Use lockout/tagout procedures on faulty equipment - Install circuit breakers on power tools - Verify all safety guards are in place before use - Encourage the use of insulated tools - Conduct regular audit of electrical cords and outlets 	2M

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
