Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Exposure during transportation, Material spills	3H	<ul style="list-style-type: none"> - Use sealed, labelled containers during transportation - Ensure all seals are intact before handling - Train staff on spill response procedures - Only transport in vehicles with proper containment facilities - Verify packaging meets regulatory standards - Maintain up-to-date transportation logs - Limit the amount of substance transported in a single trip - Ensure emergency contact details are readily available - Avoid transporting during peak traffic times - Conduct regular vehicle inspections 	2M
2. Storage	Inadequate ventilation, Incompatible substance storage	4H	<ul style="list-style-type: none"> - Maintain storage area temperature as per guidelines - Separate cytotoxic substances from incompatible materials - Install ventilation systems meeting regulatory requirements - Keep Material Safety Data Sheets (MSDS) accessible - Limit access to authorised personnel only - Inspect storage facilities regularly - Use appropriate signage to indicate storage of hazardous substances - Employ secondary containment measures for storage shelves - Implement proper inventory management to avoid overstocking - Ensure regular audits and compliance checks are conducted 	3H
3. Personal Protective Equipment (PPE)	Incorrect PPE usage, PPE failure	3H	<ul style="list-style-type: none"> - Provide appropriate PPE such as gloves, gowns, and respiratory protection - Train staff on correct PPE donning and doffing procedures - Conduct regular fit-testing of respirators - Monitor the condition of PPE and replace when necessary - Maintain a PPE inventory system - Establish a PPE disposal protocol - Inspect PPE before each use - Provide refresher training sessions annually 	2M
