Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before the task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Incorrect PPE, Inadequate training	3H	<ul style="list-style-type: none"> - Conduct training for all staff on PPE usage - Ensure all workers are wearing full PPE including gloves and masks - Supervisor to inspect PPE before task commencement - Provide a safety briefing on vermin risks - Maintain training logs for all workers - Allocate a team leader to oversee the preparation - Ensure a first-aid kit is accessible - Assess team suitability for the task - Implement communication protocols for emergencies - Ensure adherence to Safe Work Australia guidelines 	2M
2. Onsite Assessment	Unidentified vermin presence, Unsafe access	3H	<ul style="list-style-type: none"> - Conduct a walk-through of the site prior to work - Use an inspection checklist for vermin signs - Ensure proper ladder safety measures are in place - Limit access to authorised personnel only - Establish a cordoned-off safe zone - Ensure adequate lighting in work areas - Brief workers on site specific hazards - Document and report any vermin signs - Communicate assessment results to the team - Plan for additional control measures as needed 	2M
3. Setting up Equipment	Equipment malfunction, Electrical hazards	3H	<ul style="list-style-type: none"> - Regularly inspect equipment for defects - Ensure all electrical tools are tagged and tested - Use non-conductive tools near power lines - Train staff on identifying faulty equipment - Keep equipment maintenance logs - Use RCD (Residual Current Device) protections - Ensure earth testing is current - Isolate power sources when not in use 	2M
