Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips and trips, Manual handling injuries	3H	<ul style="list-style-type: none"> - Ensure area is free from debris and tripping hazards - Use proper lifting techniques and team lifts for heavy items - Conduct a pre-start briefing to identify potential hazards - Ensure appropriate PPE such as gloves and steel capped boots are worn - Check weather conditions to prepare for wet surfaces - Ensure adequate lighting in the work area - Use appropriate signage to warn of wet floors - Encourage regular breaks to avoid fatigue - Provide manual handling training for all staff - Ensure team members are aware of emergency procedures 	2M
2. Vehicle Inspection	Vehicle malfunction, Inadequate tire pressure	3H	<ul style="list-style-type: none"> - Perform a pre-operative vehicle check including lights, brakes, and steering - Check the pressure and tread depth before each trip - Keep a maintenance log for the vehicle - Ensure the vehicle is serviced according to the manufacturer's specifications - Check for any leaks or damage under the vehicle - Ensure emergency equipment is available, including a fire extinguisher and first aid kit - Train staff in vehicle inspection procedures - Ensure spare tires and tools are on board - Use a checklist to confirm inspection completion - Report any defects immediately for repairs 	1L
3. Loading Materials	Overloading, Falling materials	4A	<ul style="list-style-type: none"> - Adhere to vehicle weight limits to prevent overloading - Use load restraints and securing devices for all materials - Ensure even weight distribution when loading - Conduct a pre-load safety assessment - Use mechanical aids such as forklifts wherever possible - Verify that the load is within the capacity of the transporting vehicle - Ensure only trained personnel are involved in loading - Block off loading area to prevent unauthorised access 	2M
