

Drill Pedestal Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
Consequence Scale:								4. Engineering	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation		5. Administrative		
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution		6. PPE		
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage		Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.		
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment		<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>		
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	incorrect setup, unsecured equipment	3H	<ul style="list-style-type: none"> - Conduct a pre-start checklist to ensure all tools and equipment are in order - Secure drill pedestal and surrounding area to prevent movement - Ensure work area is clear of obstructions - Verify that all components are correctly assembled according to the manufacturer's instructions - Confirm the power supply is safe and properly connected - Brief workers on job-specific safety procedures - Make sure appropriate PPE is worn by all personnel - Set up adequate signage to warn others of the drilling operation - Use only approved and inspected tools - Ensure workers are trained in using the drill pedestal 	2M
2. Selecting Drill Bit	wrong bit selection, bit damage	3H	<ul style="list-style-type: none"> - Check drill bit specifications to ensure compatibility with the material - Inspect drill bit for wear and damage before use - Store drill bits properly to prevent damage - Only use drill bits that are appropriate for the speed and size of the drill - Confirm drill bits are securely fastened before starting - Replace worn or damaged drill bits immediately - Ensure tool workstation has easy access to the correct drill bits - Perform test drills on scrap material to verify function - Provide training on correct bit selection - Use the appropriate speed settings for different materials 	2M
3. Adjusting Speed	incorrect speed setting, overheating	3H	<ul style="list-style-type: none"> - Refer to the manufacturer's manual for correct speed settings for different materials - Install proper cooling systems or lubricants to manage heat - Regularly monitor drill operation temperatures - Provide training on how to adjust speed settings safely - Implement routine checks on drill speed controls - Use automatic speed settings if available - Record and verify speed settings during operation - Inspect speed adjustment controls for ease of use 	1L

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
