

Earth Drilling Operations Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Site Inspection	Uneven terrain, Obstacles	3H	<ul style="list-style-type: none"> - Conduct a thorough visual inspection before beginning work - Clear the site of any noticeable debris or obstacles - Use signage to warn of uneven ground - Provide adequate lighting for early identification of hazards - Ensure all workers are wearing appropriate personal protective equipment (PPE) such as steel-toed boots - Establish a clear path for equipment and personnel movement - Use ground conditioning if needed to level surfaces - Regularly re-inspect the site during operations for any changes - Brief personnel on identified hazards before commencing work - Implement a reporting system for new hazards as they are identified 	2M
2. Equipment Setup	Equipment failure, Incorrect assembly	3H	<ul style="list-style-type: none"> - Follow the manufacturer's guidelines strictly for assembly and setup - Conduct a pre-start checklist inspection of all equipment - Ensure all equipment has been maintained and serviced according to schedule - Provide qualified operators to oversee setup - Use a buddy system to double-check assembly and connections - Conduct a trial run to ensure all functions are operating correctly - Ensure availability of technical support if needed - Arrange and secure equipment to prevent tipping or collapsing - Use approved lifting equipment for heavy components - Clearly demarcate the equipment area to prevent unauthorized access 	1L
3. Drilling Preparation	Incorrect depths, Poor communication	3H	<ul style="list-style-type: none"> - Define drill parameters based on geological reports - Utilize precise measuring tools to mark drill locations - Train workers on communication protocols and signals - Establish clear drilling plans and emergency procedures - Have a competent person supervise drilling preparation - Regularly check calibration of measuring tools - Ensure all team members understand their roles and responsibility - Implement regular briefings to update on progress or changes 	2M

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
