								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
Consequence Scale:								4. Engineering	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation		5. Administrative		
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution		6. PPE		
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage		Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.		
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment		aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.		
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Pre-operation Inspection	Damaged equipment, Leaks	3H	<ul style="list-style-type: none"> - Conduct visual inspection for physical damage - Verify no fluid leaks present - Ensure all fittings and connections are tight - Check fuel levels and quality - Review previous maintenance records - Wear personal protective equipment - Use proper lighting during inspection - Ensure tools are ready and in good condition - Follow manufacturer's pre-operation checklist - Report any issues immediately 	2M
2. Checking Fuel System	Fuel spill, Inhalation of fumes	3H	<ul style="list-style-type: none"> - Use appropriate containers for fuel handling - Ensure good ventilation in the area - Wear respiratory protective equipment - Keep a fire extinguisher nearby - Follow procedures for spill containment - Inspect hoses and connections for leaks - Label fuel storage containers clearly - Avoid overfilling tanks - Ensure no ignition sources are present - Use non-sparking tools 	2M
3. Starting the Generator	Electric shock, Mechanical failure	3H	<ul style="list-style-type: none"> - Check electrical connections are secure - Stand clear of moving parts during start-up - Use insulated tools where necessary - Employ grounding techniques - Follow manufacturer's start-up procedure - Pre-warm engine if required - Confirm emergency stop is functional - Alert nearby workers before starting 	1L
