

Fasten Components Together Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	

Risk Rating & Required Action:

4A	Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.
3H	Review and approve additional controls before task starts. Senior supervisor sign-off needed.
2M	Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.
1L	Proceed, following standard operating procedures. Monitor and keep records.

Consequence Scale:

Consequence	People (injury/illness)	Project / Assets	Compliance / Reputation
Catastrophic	Fatality or permanent total disability	project shutdown	Significant regulator intervention; criminal prosecution
Major	Serious injury/illness (hospital > 5 days)	critical delay	Improvement notice; major media coverage
Moderate	Medical-treatment injury; lost-time > 1 day	moderate delay	Minor breach; adverse client comment
Minor	First-aid only, no lost time	negligible delay	Isolated non-conformance
Insignificant	No injury	no schedule impact	Deviation caught and corrected on site

Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

1. **Eliminate**
2. Substitute
3. Isolate
4. Engineering
5. Administrative
6. PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Improper tool selection, lack of training	3H	<ul style="list-style-type: none"> - Conduct pre-task briefing to discuss the required tools and procedures - Ensure all workers have completed relevant forklift component training - Check that the correct tools are readily available and suitable for the task - Assign experienced personnel to oversee the preparation phase - Implement a tool checklist for workers to verify before work begins - Make use of visual aids for demonstrating proper tool usage - Monitor workspace for potential hazard exposures - Secure and designate working area free from obstruction - Confirm all working conditions meet safety guidelines - Brief workers on emergency procedures and contact details 	2M
2. Positioning	Improper alignment, strain injuries	4H	<ul style="list-style-type: none"> - Use mechanical aids or team lifting techniques to adjust components safely - Ensure all team members use proper body mechanics to prevent strain - Provide personal protective equipment (PPE) such as gloves and safety glasses - Train workers on proper lifting techniques and manoeuvring methods - Encourage workers to take breaks to prevent fatigue - Conduct regular checks to ensure positioning equipment is functional - Minimise awkward postures by using adjustable workstations if needed - Clearly mark alignment positions for accuracy - Implement buddy systems for tasks that require manual positioning - Schedule sufficient time allocations to prevent rushed activities 	2M
3. Securing Components	Dropping components, use of incorrect fasteners	4A	<ul style="list-style-type: none"> - Use secure footholds to prevent dropping of components - Ensure all fasteners are inspected before use to confirm suitability - Provide proper storage solutions for components awaiting fastening - Train workers in the identification of proper fastener types and sizes - Equip workers with suitable PPE, including hard hats and boots - Supervise the fastening procedure to ensure compliance with safety guidelines - Conduct post-task inspections to validate fastening accuracy - Check all equipment used is operational and maintained 	2M

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
