

Handling Scaffolding In Strong Wind Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

Full Name:

Date Risk Assessment supplied to Project Manager:	

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	

Risk Rating & Required Action:

4A	Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.
3H	Review and approve additional controls before task starts. Senior supervisor sign-off needed.
2M	Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.
1L	Proceed, following standard operating procedures. Monitor and keep records.

Consequence Scale:

Consequence	People (injury/illness)	Project / Assets	Compliance / Reputation
Catastrophic	Fatality or permanent total disability	project shutdown	Significant regulator intervention; criminal prosecution
Major	Serious injury/illness (hospital > 5 days)	critical delay	Improvement notice; major media coverage
Moderate	Medical-treatment injury; lost-time > 1 day	moderate delay	Minor breach; adverse client comment
Minor	First-aid only, no lost time	negligible delay	Isolated non-conformance
Insignificant	No injury	no schedule impact	Deviation caught and corrected on site

Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

- Eliminate**
- Substitute
- Isolate
- Engineering
- Administrative
- PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Strong wind forecast, Unsecured equipment	4A	<ul style="list-style-type: none"> - Check weather forecasts regularly and plan scaffolding activities around favourable weather conditions. - Ensure all equipment and tools are securely fastened or stored properly before starting work. - Conduct a safety briefing with all staff involved in the operation. - Have a contingency plan in place for deteriorating weather conditions. - Assign a safety officer to monitor wind conditions on-site. - Establish communication protocols for rapid response to changing conditions. - Ensure all team members are trained in safe scaffolding practices. - Conduct a risk assessment specific to the site conditions. - Verify that workers are aware of emergency procedures. - Cancel or postpone work if wind conditions exceed safe limits. 	2M
2. Equipment Inspection	Defective scaffolding, Inadequate securing tools	3L	<ul style="list-style-type: none"> - Inspect all scaffolding parts for defects or damage before use. - Ensure all securing tools and devices are operational and appropriate for use. - Provide training to workers on identifying defects in equipment. - Use only certified and approved scaffolding parts. - Verify that locking mechanisms are fully functional before commencing work. - Implement a checklist for equipment inspection. - Remove any defective equipment from service immediately. - Ensure inspections are conducted by a competent person. - Keep records of all inspections conducted. - Use visual and physical checks to confirm stability and integrity of scaffolding. 	1L
3. Erecting Scaffolding	Incorrect assembly, Wind pressure on structure	4A	<ul style="list-style-type: none"> - Follow manufacturer's guidelines strictly during assembly. - Use mechanical aids to assist with lifting and positioning heavy parts. - Ensure scaffold towers are anchored securely to the ground. - Work in a team to ensure scaffolding is erected rapidly and without gaps in safety coverage. - Position scaffolds at locations shielded from wind, if possible. - Regularly check vertical and horizontal alignment using spirit levels or similar tools. - Establish exclusion zones beneath the erection area. - Use guy lines to stabilise tall scaffolds. 	2M

15. Documentation and Record Keeping	Incomplete records, Outdated information	3H		1L

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
