| 4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required. | | | | | | | | Remember to apply controls in the preferred order shown by the coloured pyramid: | |
| 3H Review and approve additional controls before task starts. Senior supervisor sign-off needed. | | | | | | | | 1. Eliminate | |
| 2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions. | | | | | | | | 2. Substitute | |

| 1. Preparation | lack of knowledge, inadequate equipment | 3H | <ul style="list-style-type: none"> - Conduct a training session to educate workers about venomous snakes. - Ensure all necessary equipment is available and in good condition. - Review the risk assessment document before starting the task. - Confirm that all team members have the required protective gear. - Prepare a communication plan for emergencies. - Set up a first aid station with necessary medical supplies. - Ensure mobile communication devices are charged and functional. - Check weather conditions and plan accordingly. - Inform the local emergency services about the planned activity. - Allocate roles and responsibilities to each team member. | 2M |
| 2. Conduct Site Assessment | unknown snake presence, unfamiliar terrain | 4H | <ul style="list-style-type: none"> - Walk the site in pairs or small groups. - Use binoculars to identify potential snake habitats from a safe distance. - Mark areas where snakes have been spotted previously. - Take note of the terrain and any obstacles that may pose a risk. - Avoid tall grass and heavy underbrush whenever possible. - Record GPS coordinates of key locations for emergency access. - Maintain a safe distance and avoid disturbing potential snake habitats. - Wear high visibility clothing to ensure all team members are easily seen. - Use long poles to gently probe areas before stepping. - Stay alert for movement or sounds indicating a snake's presence. | 3H |
| 3. Equipment Setup | equipment failure, improper setup | 3H | <ul style="list-style-type: none"> - Conduct a thorough equipment check prior to use. - Ensure that all team members have been trained on equipment use. - Use only equipment that is in good working condition and suitable for the task. - Set up equipment in a flat, stable area away from potential snake habitats. - Clearly mark the boundaries of the equipment setup area. - Have a plan in place for quick removal or deactivation of equipment in case of a snake sighting. - Limit the amount of time spent setting up to reduce exposure. - Ensure that any electronic devices are fully charged and tested. | 2M |
