

Heat Press Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Unorganised workspace, Improper clothing	3H	<ul style="list-style-type: none"> - Ensure workspace is tidy and free from obstruction - All personnel to wear appropriate work clothing and personal protective equipment (PPE) such as gloves and aprons - Conduct a pre-task briefing to ensure all workers understand the process and potential hazards - Check all equipment and tools to ensure they are in good working order - Review safety data sheets (SDS) for all materials used during the process - Implement a workplace inspection checklist to identify potential hazards before starting the task - Ensure emergency procedures are known and accessible - Ensure first aid kit is fully stocked and accessible - Confirm all safety signs and labels are visible and legible - Ensure proper maintenance of heat press machine before operation 	2M
2. Turning on the Heat Press	Electric shock, Burn injuries	1A	<ul style="list-style-type: none"> - Inspect electrical cords and connections before switching on - Ensure machine is grounded properly - Always use insulated gloves while operating the heat press - Place warning signs indicating hot surfaces and electrical danger - Secure a safety switch and circuit breaker in place - Provide frequent electrical safety checks by a qualified technician - Install Residual Current Devices (RCDs) for additional protection - Instruct operators on emergency stop procedures - Limit access to the machine to trained personnel only - Maintain a safe distance from the heat elements during operation 	2M
3. Loading Materials	Pinch points, Back strain	3H	<ul style="list-style-type: none"> - Employ mechanical aids or request assistance for heavy material handling - Provide training on proper lifting techniques - Ensure materials are pre-arranged and within easy reach to prevent excessive stretching - Use equipment guards and safety mechanisms to prevent accidental contact - Enforce use of gloves to handle materials safely during loading - Adjust work height to an ergonomic level - Provide anti-fatigue mats in standing areas - Keep hands clear of moving parts and pinch points 	1L

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
