Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate PPE, Unfamiliarity with site layout	3H	<ul style="list-style-type: none"> Conduct site induction for new workers Ensure PPE is available and correctly worn Review safety protocols Conduct toolbox talk Prepare emergency contacts list Brief workers on site-specific hazards Verify workers have completed relevant training Make a site map accessible Confirm the availability of first aid provisions Set clear communication lines among staff 	2M
2. Accessing High-rise	Falling during ascent, Equipment drop risk	4H	<ul style="list-style-type: none"> Use certified ladders and fall arrest systems Inspect access equipment before use Ensure equipment is hoisted securely Personnel should have working-at-heights training Limit access to authorized personnel only Designate drop zone exclusion areas Install safety nets where feasible Secure tools with lanyards or bags Brief workers on emergency descent procedures Engage a spotter to monitor ascent 	2M
3. Conducting Electrical Inspection	Contact with live wires, Electrocution risk	4A	<ul style="list-style-type: none"> De-energize circuits before commencing Use insulated tools rated for electrical work Test for live circuits using reliable devices Personnel should be qualified electricians Display warning signs on live work areas Apply lockout/tagout procedures on equipment Ensure dry conditions in inspection area Wear appropriate voltage-rated gloves 	2M
