Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate PPE, Slippery surfaces	3H	<ul style="list-style-type: none"> - Conduct a pre-start meeting to discuss daily activities and hazards. - Ensure all personnel are wearing appropriate PPE including gloves, face shields, and steel-capped boots. - Perform a walk-through inspection to identify and remove any potential slip hazards in the work area. - Ensure easy access to eye wash stations and first aid supplies. - Provide training for the correct use and maintenance of PPE. - Display clear signage indicating PPE requirements. - Implement housekeeping procedures to keep the area tidy. - Maintain clear walkways to prevent tripping and slips. - Conduct regular ground and equipment checks. - Establish a site-specific induction program for all workers. 	2M
2. Handling Raw Materials	Manual handling injuries, Exposure to dust	3H	<ul style="list-style-type: none"> - Provide mechanical aids for lifting heavy materials. - Conduct manual handling training for all employees. - Provide dust masks or respirators where necessary. - Install ventilation systems to minimise dust exposure. - Use vacuum systems for cleaning instead of dry sweeping. - Ensure regular rest breaks to avoid fatigue. - Rotate tasks to minimise prolonged repetitive movements. - Conduct regular health assessments for workers. - Ensure spill kits are easily accessible. - Implement a manual handling policy. 	2M
3. Heating	Burns from hot surfaces, Gas leaks	4A	<ul style="list-style-type: none"> - Install appropriate guards around hot surfaces. - Use thermal imaging to check for potential leaks in gas pipes. - Provide training in the operation of heating equipment. - Ensure emergency shut-off procedures are prominently displayed and known by all staff. - Regularly maintain heating equipment and check for wear and tear. - Use non-flammable clothing materials for workers. - Establish a buddy system for monitoring worker safety. - Install gas detection systems to alert to leaks. 	3H
