Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Exposure to flammable materials, Electrical hazards	3H	<ul style="list-style-type: none"> - Conduct a thorough site inspection to identify flammable materials - Ensure all electrical equipment is properly grounded - Use appropriate signage to mark hazardous areas - Provide protective barriers around the work area - Conduct safety briefings with all personnel involved - Remove any unnecessary equipment from the work area - Have fire extinguishers readily accessible - Limit access to the worksite to authorized personnel only - Conduct pre-job risk assessments - Verify current weather conditions and assess their impact on the work 	2M
2. Site Isolation	Accidental entry, Presence of unauthorised personnel	3H	<ul style="list-style-type: none"> - Clearly define and mark the worksite boundaries - Use temporary fencing for physical barriers - Establish security protocols for access control - Deploy signage to inform of restricted access - Supervise the isolation process - Implement a buddy system for accountability - Use caution tape to indicate danger zones - Ensure strict compliance with permit systems - Regularly inspect isolation barriers - Assign a site supervisor for continuous oversight 	1L
3. Equipment Inspection	Faulty tools, Equipment malfunction	3H	<ul style="list-style-type: none"> - Conduct pre-use inspections on all equipment - Replace defective tools immediately - Keep maintenance logs easily accessible - Ensure all equipment meets regulatory standards - Regular training for equipment operators - Use only certified tools and equipment - Regularly schedule maintenance checks - Have spare parts readily available for common failures 	2M
