Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Incorrect equipment setup, Loose connections	4A	<ul style="list-style-type: none"> - Inspect all equipment before use to ensure it's in good condition - Verify connections are secure before proceeding - Ensure that the work area is well ventilated to disperse fumes - Keep a fire extinguisher nearby in case of emergency - Educate workers on equipment handling procedures - Check that the soldering iron is in good working order - Wear appropriate personal protective equipment (PPE) such as gloves and goggles - Remove any flammable materials from the work area - Ensure that a trained person is supervising the work - Conduct a toolbox talk to discuss hazards of the task - Develop a site-specific risk assessment 	2M
2. Equipment Inspection	Faulty equipment, Electrical hazards	3H	<ul style="list-style-type: none"> - Conduct a thorough inspection of all equipment prior to use - Ensure electrical equipment is tagged and tested - Replace faulty equipment immediately - Use only insulated tools and handles - Ensure power is turned off when connecting equipment - Train workers in electrical safety protocols - Maintain a register of all equipment inspections - Implement a lockout/tagout system for electrical hazards - Provide training on recognising equipment faults - Regularly update training and inspection protocols 	1L
3. Workspace Setup	Cluttered workspace, Inadequate lighting	3H	<ul style="list-style-type: none"> - Clear the workspace of any unnecessary items - Ensure adequate lighting is provided for detailed soldering work - Position work benches and tools for optimal safety and efficiency - Lay out tools in an organised manner - Have a designated area for completed work and a separate area for awaiting tasks - Use portable work lights if required - Implement a housekeeping schedule 	1L
