Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Trip over tools, Back strain	3H	<ul style="list-style-type: none"> - Keep the workspace tidy and tools organized - Lift with the legs and not with the back - Use a tool belt or pouch to minimize trips - Instruct workers on correct lifting techniques - Ensure adequate lighting to see obstacles clearly - Plan the workflow to minimize unnecessary movement - Use work boots for ankle support - Schedule regular breaks to avoid fatigue - Assign tasks to minimize overreaching - Ensure an emergency plan is in place 	2M
2. Review Product Instructions	Paper cuts, Misuse of tools	2H	<ul style="list-style-type: none"> - Wear gloves to protect hands - Use a proper trimmer instead of hands for cutting - Carefully review tool functionality before use - Conduct a toolbox meeting to discuss instruction properly - Use a magnifying glass if text is small - Supervise less experienced workers - Provide instruction manuals digitally, if possible - Train workers on correct tool usage - Use instructional videos for better comprehension - Keep first aid kit readily accessible 	1L
3. Measure Cabinet	Wrong measurements, Injury from measurement tape	3H	<ul style="list-style-type: none"> - Double-check all measurements - Use measuring tapes that retract slowly - Ensure measurement is done by experienced personnel - Mark measurements clearly - Use laser distance measurers for high accuracy - Provide PPE gloves to protect hands - Highlight risk areas during toolbox talks - Verify measurements with another worker 	2M
