THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate planning, Poor understanding of site conditions	3H	<ul style="list-style-type: none"> Conduct detailed site survey and assessment Develop comprehensive installation plan Ensure all necessary permits and approvals are secured Consult with all stakeholders for site-specific advice Develop emergency response plan specific to site conditions Organise pre-construction meeting with all involved parties Review equipment and personnel requirements Update all workers on identified hazards and controls Verify availability of engineering solutions Ensure availability of required PPE 	2M
2. Personnel Training	Lack of skill, Miscommunication	3H	<ul style="list-style-type: none"> Conduct specialised training for helical pile installation Use visual aids and demonstrations for complex procedures Develop clear communication protocols Perform regular safety briefings prior to work Require site-specific induction training Implement language support if necessary Regularly assess worker competency Enforce supervision by experienced personnel Include emergency response training Record and document all training sessions 	2M
3. Site Access	Slips and trips, Vehicle collisions	3H	<ul style="list-style-type: none"> Conduct site access risk assessment Ensure clear signage for restricted areas Establish designated pedestrian pathways Contact local authorities for traffic management Coordinate delivery schedules to minimise congestion Implement speed limits on site Use spotters when reversing vehicles Ensure vehicles are well-maintained 	2M
