Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

1. Preparation	contact with sharp tools, slips and trips	3H	<ul style="list-style-type: none"> - Ensure work area is clean and free of debris before starting. - Wear appropriate PPE including gloves and non-slip shoes. - Organise tools and jigs to avoid haphazard placement. - Conduct a visual inspection of the work area for hazards. - Train workers on hazard identification and control measures. - Use appropriate signage to highlight any slippery areas. - Ensure adequate lighting in the work area. - Restrict access to authorised personnel only. - Keep emergency contact numbers visible. - Provide workers with a pre-task safety briefing. 	2M
2. Gathering Tools and Equipment	manual handling injuries, tool malfunction	3H	<ul style="list-style-type: none"> - Use trolleys or hoists to transport heavy tools when possible. - Train workers in safe manual handling techniques. - Perform regular maintenance and checks on all tools and equipment. - Provide appropriate PPE such as gloves and tool belts. - Ensure all employees are trained in the correct use of tools. - Store tools securely when not in use. - Label tools and equipment correctly. - Ensure all tools have safety guards where applicable. - Have a regular tool inspection schedule. - Remove defective tools immediately from service. 	2M
3. Setting Up Work Area	ergonomic strain, inadequate lighting	3H	<ul style="list-style-type: none"> - Design workstations to accommodate a range of body sizes and postures. - Provide adjustable workbenches and seating where possible. - Conduct an ergonomic assessment of the work area. - Ensure adequate lighting is available and functional. - Train workers on best ergonomic practices. - Implement scheduled work breaks to reduce strain. - Use anti-fatigue mats where workers stand for long periods. - Install task lighting to supplement general lighting. 	1L
