Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips, trips and falls, Sharp objects	3H	<ul style="list-style-type: none"> - Ensure the area is well-lit and free from obstruction - Use signage to highlight potential hazards - Wear appropriate personal protective equipment (PPE) including sturdy boots and gloves - Conduct a site inspection before beginning work - Provide training on hazard recognition and safety practices - Keep tools organised and properly stored - Ensure floors are clean and dry - Install anti-slip mats where necessary - Designate walkways and keep them clear - Use caution when handling sharp tools 	2M
2. Measuring and Marking	Incorrect measurements, Straining or repetitive motion injury	3H	<ul style="list-style-type: none"> - Follow standard operating procedures for measuring and marking - Provide training on proper use of measuring tools, such as tape measures and squares - Take regular breaks to avoid muscle fatigue - Use ergonomic tools when available - Double-check measurements to ensure accuracy - Store measuring tools safely and correctly - Encourage team members to speak up if they have measurement concerns - Perform regular tool maintenance - Ensure good lighting to reduce strain - Label tools to avoid confusion 	2M
3. Machine Operation	Entanglement, Noise levels	4A	<ul style="list-style-type: none"> - Wear fitted clothing to reduce risk of entanglement - Ensure that hair and jewellery are properly secured - Implement regular machine maintenance schedules - Use hearing protection when operating loud machinery - Provide training on the safe operation of machinery - Install emergency stop features on machines - Restrict access to machines to trained personnel only - Supervise inexperienced operators 	2M
