

Joinery Work With Mortising Machines Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
Consequence Scale:								4. Engineering	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
								<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	slipping on wet floors, tripping over obstacles	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify and clear any obstacles in the work area. - Ensure all walkways are clean and dry before beginning work. - Implement wet floor signs if necessary. - Ensure adequate lighting in the workspace to identify potential hazards. - Conduct a toolbox talk to highlight site hazards and controls. - Maintain cleanliness and orderliness at all times. - Use non-slip mats in areas prone to wetness. - Regularly inspect and clean the workspace as needed. - Allocate tasks to those trained in hazard management. - Ensure personal protective equipment (PPE) is available and worn. 	1L
2. Machine Setup	incorrect machine setup, electrical shock	4H	<ul style="list-style-type: none"> - Only allow trained personnel to set up the machine. - Follow the manufacturer's instructions for setup. - Ensure the machine is unplugged during setup to eliminate electrical hazards. - Use lockout/tagout procedures when necessary. - Test the electrical grounding of the machine to prevent shocks. - Verify that all safety guards are in place and functional. - Conduct a pre-use inspection and document findings. - Regularly maintain the machine according to the schedule. - Keep a guide nearby to ensure correct setup is always followed. - Have an emergency response plan in place. 	2M
3. Tool Selection	using inappropriate tools, cuts and abrasions	3H	<ul style="list-style-type: none"> - Choose tools specifically designed for the task. - Inspect tools for defects or damage before use. - Provide training on the selection and handling of tools. - Regularly service and maintain all tools. - Keep a first aid kit accessible in case of injury. - Implement a tool check-out system to ensure the use of correct tools. - Test ergonomics of tools to reduce injury. - Use the proper personal protective equipment when handling tools. 	1L

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
