Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips, trips	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify hazards - Train workers on safe work practices - Ensure PPE is worn, including non-slip shoes - Maintain a clean work area to avoid debris build-up - Ensure effective drainage of the site - Mark uneven surfaces clearly - Schedule regular breaks to reduce fatigue - Install adequate temporary lighting - Review risk assessments regularly - Provide first-aid on site 	2M
2. Delivery of Materials	vehicle collisions, manual handling injuries	3H	<ul style="list-style-type: none"> - Use designated delivery zones - Implement traffic management plans - Provide safety induction to drivers - Ensure materials are secured during transport - Use mechanical aids for unloading - Train workers on safe lifting techniques - Implement buddy system for heavy lifting - Conduct visual inspection of materials and equipment - Ensure communication devices are available - Schedule deliveries during off-peak hours 	1L
3. Base Preparation	dust inhalation, equipment malfunction	3H	<ul style="list-style-type: none"> - Apply dust suppression techniques - Use respiratory protection for workers - Maintain and inspect equipment before use - Train workers in equipment operation - Regular breaks to prevent overheating of machinery - Supervise all equipment operation - Conduct pre-operational equipment checks - Implement lockout procedures 	2M
