								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Weather conditions, Inadequate training	3H	<ul style="list-style-type: none"> Conduct a pre-operation weather assessment Verify that all crew members have received appropriate training Brief all crew on the specific hazards Ensure communication equipment is functional Check emergency backup systems Review route and destination details Ensure all safety gear is accessible Verify lifeboat readiness Check lifeboat fill level Establish emergency contact protocol 	2M
2. Deployment Preparation	Equipment malfunction, Improper load distribution	3H	<ul style="list-style-type: none"> Inspect deployment equipment Conduct safety briefing focused on deployment Practice load balancing techniques Use proper lifting and lowering techniques Ensure communication signals are established Verify the readiness of all safety mechanisms Implement a double-check system for load distribution Ensure all securing lines are in good condition Review emergency stop procedures Ensure all crew are clear of moving parts 	2M
3. Launching	Capsizing, Fall hazards	4A	<ul style="list-style-type: none"> Use anti-slip mats and tapes Coordinate launch with clear signals Monitor lifeboat for any imbalances Conduct a pre-launch checklist review Use lifelines and harnesses where necessary Post an experienced supervisor to oversee the launch Ensure lifejackets are properly worn and secured Maintain a clear communication line during launch 	3H
