Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Risk Identification	Drowning, Exposure to cold waters	4A	<ul style="list-style-type: none"> - Conduct site inspection to identify potential hazards - Liaise with local maritime authority for water conditions - Review weather forecast for potential changes - Identify escape routes and emergency protocols - Ensure adequate signage for hazard awareness - Record identified risks for documentation - Brief personnel on water conditions - Assign personnel to oversee risk management - Implement communication systems - Designate emergency response team 	3H
2. Equipment Inspection	Equipment failure, Inadequate safety gear	4M	<ul style="list-style-type: none"> - Conduct pre-use inspection of lifting equipment - Ensure all equipment is certified and tagged - Check for wear and tear on ropes and harnesses - Verify load ratings of lifting devices - Ensure sufficient supply of personal flotation devices - Test waterproof communication equipment - Maintain records of equipment inspections - Implement a reporting protocol for equipment issues - Conduct training on equipment use - Ensure regular maintenance is scheduled 	2M
3. Team Preparation	Inexperience, Poor communication	3H	<ul style="list-style-type: none"> - Conduct training on water rescue procedures - Assign roles and responsibilities clearly - Conduct mock drills for lifting operations - Establish communication protocols - Ensure team inclusivity in safety briefings - Provide clear guidelines and expectations - Encourage team input on safety measures - Conduct briefings before operations 	2M
