Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Review Weather Conditions	Extreme cold temperatures, High winds	3H	<ul style="list-style-type: none"> - Check local weather forecasts before work starts - Plan work around predicted extreme weather - Brief workers on expected conditions - Ensure protective clothing is available - Adjust schedules to avoid coldest parts of the day - Create an emergency plan for severe conditions - Assign a dedicated weather monitoring person - Rotate tasks to minimize exposure - Suspend work when necessary - Keep abreast of weather changes 	2M
2. Site Assessment	Icy surfaces, Snow accumulation	3H	<ul style="list-style-type: none"> - Conduct a thorough site inspection - Identify potential risk areas - Remove snow from work areas - Apply salt/grit to icy patches - Erect warning signs on high-risk zones - Ensure drainage systems are clear - Monitor ground conditions continuously - Provide workers with appropriate footwear - Create barriers around dangerous areas - Record site assessments regularly 	2M
3. Equipment Check	Malfunction due to cold, Increased wear and tear	3H	<ul style="list-style-type: none"> - Inspect all equipment before use - Maintain equipment according to manufacturer's cold weather guidelines - Use weather-resistant equipment where possible - Ensure fuel and battery stocks are sufficient - Implement a routine maintenance program - Train workers in equipment checks - Store equipment in sheltered locations overnight - Warm up machinery gradually 	2M
