								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips on floor, Eye injury from particles	3H	<ul style="list-style-type: none"> - Ensure the work area is dry and clean before starting - Wear safety goggles to prevent eye injuries - Place signage around wet areas - Provide adequate lighting - Conduct a safety briefing prior to starting work - Check Personal Protective Equipment (PPE) availability - Inspect emergency exits are clear - Conduct pre-operational equipment checks - Ensure all workers are trained on procedures - Use anti-slip mats on the floor 	2M
2. Equipment Setup	Electrical shock, Back injury from lifting	3H	<ul style="list-style-type: none"> - All equipment should be properly grounded - Use lifting aids/crolleys for heavy items - Verify electrical cords and connections are intact - Ensure electronic components are dry - Train staff in proper lifting techniques - Conduct checks by certified electricians - Use Low Voltage (LV) tools where possible - Provide PPE like insulated gloves - Label all electrical panels clearly - Keep the working surface clear of obstructions 	1L
3. Machine Startup	Noise-induced hearing loss, Entrapment in machinery	3H	<ul style="list-style-type: none"> - Equip all workers with hearing protection devices - Install emergency stop buttons at operator stations - Display noise level signage clearly - Enclose loud machinery to contain noise - Ensure all guards are in place before operating - Implement lockout/tagout procedures - Supervise machine startup with trained personnel - Conduct regular maintenance checks 	2M
