Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slippery surfaces, Noise exposure	3H	<ul style="list-style-type: none"> - Ensure floors are clean and dry before starting work - Use ear protection equipment to reduce noise impact - Conduct pre-start briefings to discuss work environment conditions - Install sound barriers where possible - Regular maintenance of noise-reducing equipment - Schedule regular breaks for operators - Provide slip-resistant footwear - Ensure adequate signage for slippery areas - Improve lighting to spot spills early - Implement cleaning of any spills 	2M
2. Loading Material	Manual handling injuries, Material falling	3H	<ul style="list-style-type: none"> - Use mechanical aids like hoists and trolleys to move materials - Train workers in correct lifting techniques - Wear appropriate PPE, such as gloves and steel-capped boots - Ensure proper stacking of materials - Use load indicators to ensure weights are within safe limits - Regularly inspect lifting equipment for integrity - Provide buddy system for awkward lifts - Ensure clear communication among team members - Implement exclusion zones during loading - Conduct regular risk assessments 	2M
3. Machine Setup	Electrical shock, Entanglement	4A	<ul style="list-style-type: none"> - Ensure all electrical components are properly insulated - Install emergency stop buttons within reach - Use lock-out/tag-out procedures during setup - Provide adequate training on safe operation - Keep loose clothing and jewellery away from machinery - Conduct pre-operation checks regularly - Equip machines with guarding - Regularly maintain and inspect all equipment 	3H
