THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inhalation of fumes, Skin contact	3H	<ul style="list-style-type: none"> - Ensure adequate ventilation in the work area - Use fume extractor during mixing - Wear appropriate personal protective equipment (PPE) such as gloves and goggles - Pre-read Safety Data Sheets (SDS) for hazardous materials - Train staff in safe handling of epoxy resins - Ensure emergency procedures are in place - Maintain easy access to wash stations - Label all containers accurately - Limit exposure times through job rotation - Consider health monitoring for workers exposed to epoxy resins 	2M
2. Mixing Equipment Setup	Equipment malfunction, Electric shock	3H	<ul style="list-style-type: none"> - Inspect equipment before use - Ensure all mixing equipment is properly grounded - Regular maintenance and testing of electrical equipment - Provide training on equipment use - Use non-sparking tools when necessary - Verify all guards are in place and secure - Use power sources with Residual Current Devices (RCDs) - Ensure dry hands and surfaces when operating electrical equipment - Install emergency stops - Implement lockout/tagout procedures for maintenance 	1L
3. Measuring Components	Spillage, Inaccurate measurements	2M	<ul style="list-style-type: none"> - Use calibrated measuring tools and equipment - Reduce manual handling of containers - Train workers in precision measurement techniques - Handle materials over containment trays - Familiarise workers with product ratios and specifications - Wear protective gloves and goggles - Implement protocols for immediate cleanup of spills - Allocate a designated area for measuring components 	1L

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
