Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Area Survey and Planning	Slippery surfaces, Uneven terrain	3H	<ul style="list-style-type: none"> - Conduct a thorough survey of the area to identify potential hazards. - Clearly mark uneven terrain and require workers to wear appropriate footwear. - Use signs to indicate slippery surfaces. - Schedule work during optimal weather conditions to minimise risks. - Ensure all workers are trained to identify and report hazards. 	2M
2. Equipment Preparation	Mechanical failure, Improper use of equipment	4A	<ul style="list-style-type: none"> - Perform regular maintenance checks on all equipment. - Use equipment as per manufacturer instructions. - Train workers on the proper use of all equipment. - Keep spare parts readily available to address mechanical failures. - Implement a pre-start checklist for equipment. 	2M
3. Assemble Team	Lack of communication, Unclear roles	3H	<ul style="list-style-type: none"> - Brief all team members on the work plan and individual roles. - Establish clear communication channels and protocols. - Conduct regular toolbox talks to reinforce safety communication. - Ensure all workers are equipped with radios or pertinent communication devices. - Assign a team leader to coordinate and supervise the activities. 	2M
