								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Insufficient lighting, Failure to secure equipment	3H	<ul style="list-style-type: none"> - Ensure all diving equipment is checked before dive - Pack and test underwater flashlights and backup lamps - Double-check all seals and fasteners on equipment - Develop a communication plan with hand signals - Conduct a pre-dive check with all team members - Review emergency procedures with entire dive team - Set up a buddy system for all divers - Ensure all divers are properly trained for night diving - Assess weather and water conditions prior to dive - Confirm all safety protocols with dive team 	1L
2. Departure	Slip hazards on wet surfaces Equipment mishandling	3H	<ul style="list-style-type: none"> - Maintain dry pathways with non-slip surfaces - Carry equipment with care and ensure balanced distribution - Use proper technique for transporting heavy equipment - Ensure proper lighting when moving equipment - Wear non-slip footwear - Practice safe lifting techniques - Ensure secure footing before moving - Supervise less experienced team members - Confirm all divers are fitted with all required safety gear - Conduct final equipment checks 	2M
3. Entry into Water	Disorientation upon entry, Visibility reduction	3H	<ul style="list-style-type: none"> - Use clear hand signals to coordinate entry - Enter water slowly to adjust to conditions - Use buddy system to maintain orientation - Descend using a predefined line or reel - Use strobe markers for descent line - Provide briefing on expected underwater conditions - Keep flashlight beam directed towards descent path - Maintain close proximity to dive buddy 	1L
