Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips on wet floors, muscle strains from lifting	3H	<ul style="list-style-type: none"> - Conduct pre-operational check of machinery - Ensure floors are dry before operating - Use proper lifting techniques when placing or removing parts - Wear non-slip footwear - Ensure good lighting in the working area - Provide training on equipment operation - Ensure all guards are in place - Implement cleaning schedule to manage wet areas - Regularly maintain the machine for optimal performance - Confirm control panels are functioning correctly 	2M
2. Pre-Operational Inspection	electrical malfunction, exposure to sharp edges	3H	<ul style="list-style-type: none"> - Inspect all electrical components for damage - Follow lock out/tag out procedures during maintenance - Wear personal protective equipment (PPE) - Check for exposed wires or damaged insulation - Regularly service electrical systems - Cover any exposed sharp edges - Keep a first aid kit accessible - Train staff on emergency shut-off procedures - Label controls clearly - Implement routine safety audits 	2M
3. Operating Machine	collisions with obstacles, operator fatigue	3H	<ul style="list-style-type: none"> - Maintain a clear operational pathway - Use mirrors or cameras for blind spots - Implement scheduled breaks to prevent fatigue - Establish a site traffic management plan - Conduct operator training sessions regularly - Ensure effective communication among staff - Use high-visibility gear - Provide operator support via spotters if needed 	1L
