Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips, cuts	2M	<ul style="list-style-type: none"> - Use slip-resistant footwear - Cut-resistant gloves to be worn - Ensure work area is clean and free of debris - Provide adequate lighting - Conduct pre-work briefing on potential hazards - Keep first aid kit accessible on site - Regularly inspect tools for safety - Ensure staff are trained in manual handling - Barricade the area to prevent entry by untrained personnel - Post hazard warning signs 	1L
2. Measuring and Marking	inaccurate measurement leading to errors, repetitive strain injuries	3M	<ul style="list-style-type: none"> - Train workers on proper measurement techniques - Use ergonomic tools and equipment - Take regular breaks to prevent strain - Double-check measurements before marking - Keep measuring devices calibrated - Use digital tools to minimise human error - Ensure adequate workspace and ventilation - Implement a buddy system for double-checking - Enforce mandatory rest periods - Provide adjustable workstations 	2M
3. Cutting Material	sharp tool usage, flying debris	4A	<ul style="list-style-type: none"> - Use proper personal protective equipment (PPE): eye and ear protection, gloves - Maintain and regularly check cutting tools - Use guards on all saws and cutting machines - Install dust extraction systems - Provide training in correct tool usage - Ensure clear communication between workers during operation - Limit access to cutting area to essential personnel only - Install barriers to contain flying debris 	2M
