								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Site Inspection	Uneven ground, Obstacles	3H	<ul style="list-style-type: none"> Conduct a thorough site survey before starting work Remove all unnecessary obstacles from the work area Mark uneven areas with high-visibility paint Ensure all workers are aware of the site layout and potential hazards Use appropriate footwear with good grip Plan entry and exit paths for equipment Install safety signs around hazardous areas Assign a site supervisor to oversee safety protocols Use machinery to level the ground when possible Maintain clear communication among team members 	2M
2. Equipment Check	Faulty machinery, Lack of maintenance	3H	<ul style="list-style-type: none"> Perform pre-operation checks on all machinery Ensure all equipment has a current maintenance record Replace any faulty equipment before use Provide training on equipment inspection procedures Ensure all moving parts are well-lubricated Use checklists for equipment inspection Store equipment in a dry, secure area when not in use Train operators on identifying signs of equipment failure Ensure all operators are licensed Log all equipment defects and repairs 	2M
3. PPE Preparation	Inadequate PPE, Poor PPE use	2M	<ul style="list-style-type: none"> Conduct a PPE briefing prior to work Ensure all workers have access to proper PPE Inspect PPE for any damages before use Provide training on correct PPE usage Ensure PPE is used at all times during operations Replace worn or damaged PPE immediately Establish a PPE storage area to prevent damage Monitor PPE compliance throughout the day 	1L
