Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Muscle strain, Tripping	3H	<ul style="list-style-type: none"> - Conduct a warm-up exercise session before commencing work. - Ensure area is clear of potential tripping hazards like branches and tools. - Brief on correct posture techniques for raking. - Allocate rest breaks to prevent fatigue. - Check weather conditions - avoid raking during wet conditions. - Review and update training on equipment handling. - Inform workers of safety emergency procedures. - Use communication tools to maintain contact with team. - Designate a safe tool storage area. - Assign tasks according to worker's physical capability. 	2M
2. Inspect Equipment	Equipment failure, Injury from sharp edges	3H	<ul style="list-style-type: none"> - Perform a thorough inspection of all tools before use. - Replace damaged or worn equipment. - Use gloves to handle any tools with potential sharp edges. - Maintain tools regularly as per manufacturer's instructions. - Store tools in a safe, designated location. - Label or tag faulty equipment for repair. - Ensure workers are trained in tool inspection techniques. - Use brightly-coloured tools to improve visibility. - Inspect tools for loose parts or screws. - Only use tools for their intended purpose to prevent misuse. 	1L
3. Assess Work Area	Slips and falls, Debris hidden in foliage	4A	<ul style="list-style-type: none"> - Walk through work area to identify potential hazards. - Remove any visible debris, rocks, or twigs. - Use high-visibility markers to outline the designated work area. - Provide workers with appropriate footwear with good grip. - Clear area of any non-essential staff or bystanders. - Communicate identified hazards to all team members. - Plan the work path to minimize cross-traffic. - Designate a spotter if visibility is poor or terrain is uneven. 	2M
