THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Equipment failure, Insufficient training	3H	<ul style="list-style-type: none"> - Conduct pre-dive equipment checks - Ensure all team members have up-to-date certifications - Provide comprehensive dive briefing - Verify that all safety procedures are understood - Confirm emergency contacts and protocols - Inspect and maintain diving equipment regularly - Review dive plan thoroughly - Verify all team members are medically fit - Ensure availability of first aid kit - Conduct dry run of emergency procedures 	2M
2. Entering the Water	Slip and fall, Unexpected weather changes	3H	<ul style="list-style-type: none"> - Use designated entry points - Employ non-slip mats where possible - Monitor weather reports closely - Adapt plans to changing conditions - Conduct visual inspection of entry area - Use handrails when available - Ensure spotter is present during entry - Brief team on emergency exit routes - Use appropriate entry techniques for conditions - Establish clear hand signals for water entry 	2M
3. Descending	Impaired visibility, Barotrauma	4A	<ul style="list-style-type: none"> - Use dive lights in low visibility conditions - Monitor descent rates closely - Ensure proper equalisation techniques - Maintain communication with surface team - Implement buddy system - Utilise dive computers to track depth - Conduct descent gradually - Regularly check equipment during descent 	3H
