### Risk Rating & Required Action:

| 4A | Stop work. The risk is intolerable, minate the hazard predesign the activity before proceeding. A Safe Work |
|----|---|
|    | Method Statement (SWMS) or hit er-level authorisation is required.  |
| 3H | Review and approve additional controls to the last arts. Senior supervisor sign-off needed.                 |
| 2M | Ensure all nominated controls are in prace and efficiency roceed with caution; monitor conditions.          |
| 1L | Proceed, following standard operating procedures. Monitor and keep records.                                 |

### **Consequence Scale:**

| Consequence   | People (injury/illness)                     | Project / Assets   | Compliance / Reputation                                  |
|---------------|---|--------------------|--|
| Catastrophic  | Fatality or permanent total disability      | project shutdown   | Significant regulator intervention; criminal prosecution |
| Major         | Serious injury/illness (hospital > 5 days)  | critical delay     | Improvement notice; major media coverage                 |
| ivioderate    | Medical-treatment injury; lost-time > 1 day | moderate delay     | Minor breach; adverse client comment                     |
| Minor         | First-aid only, no lost time                | negligible delay   | Isolated non-conformance                                 |
| Insignificant | No injury                                   | no schedule impact | Deviation caught and corrected on site                   |

#### Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

- 1. Eliminate
- Substitute
- Isolate
- 4. Engineering
- 5. Administrative
- 6. PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

| JOB STEP                      | POTENTIAL HAZARDS                                 | IR              | CONTROL MEASURES  | RR               |
|-------------------------------|---|-----------------|---|------------------|
| SPECIFIC WORK STEPS           | HAZARDS THAT MAY ARISE                            | INITIAL<br>RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS  | RESIDUAL<br>RISK |
| Preparation and Mobilisation  | Weather conditions, Traffic exposure              | ЗН              | <ul> <li>Check daily weather forecasts and prepare accordingly with appropriate gear.</li> <li>Plan work to avoid peak traffic hours, if possible.</li> <li>Set up appropriate signage and barriers before commercing work.</li> <li>Ensure all necessary tools and equipment are part and checked for functionality.</li> <li>Conduct toolbox talk addressing today's specific azards and and inditions.</li> <li>Ensure all workers have the regired PPE, including this possibility clothing and hard hats.</li> <li>Confirm communications vices as working and distributed among team members.</li> <li>Obtain necessary permits and clear sees for socal authorities.</li> <li>Brief the team is emergency evacuate procedures.</li> <li>Assis to as and apponsibilities clearly to each member of the team.</li> </ul> | 2M               |
| 2. Site Survey and Inspection | Unidentified site hazards. Unsafe road conditions | 31              | - Walk to ough the work the to identify any potential hazards, such as uneven ground or sharp debris.  - Use the side of any immediate traffic hazards or road irregularities.  - Use the and site plans to confirm location and boundaries for work.  - Insure signage is visible and provides adequate warning to road users.  - Remove or clearly mark dangerous debris to prevent tripping.  - Use barricades to keep pedestrians away from work area.  - Report any unsafe conditions to the site supervisor immediately for further action.  - Conduct dynamic risk assessment if new hazards appear during the survey.  - Maintain a small first aid kit readily accessible for quick response.  - Regularly update site conditions feedback to planning team.   | 2M               |
| 3. Equipment Setup            | Mechanical failure, Equipment instability         | 3H              | <ul> <li>Confirm equipment is in good working order before transporting to the site.</li> <li>Position equipment on stable ground to prevent tipping.</li> <li>Regularly maintain and service machinery as per manufacturer's guidelines.</li> <li>Use appropriate stands or stabilisers to secure machinery firmly in position.</li> <li>Check fuel, oil, and lubricants levels regularly and refill as necessary.</li> <li>Keep a fire extinguisher nearby if using fuel-powered equipment.</li> <li>Prevent strangers from interacting with or operating machinery.</li> <li>Keep potential entanglement areas clear from workers and bystanders.</li> </ul>   | 2M               |

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
