Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate equipment, Lack of trained personnel	3H	<ul style="list-style-type: none"> - Conduct equipment inspection prior to drills - Ensure all personnel are trained and familiar with their roles - Brief team about potential hazards - Develop a communications plan for the drill - Designate safe zones clearly - Ensure accessibility to first aid kits - Establish emergency procedures - Mark boundaries clearly - Assign roles and responsibilities - Check weather conditions 	2M
2. Briefing	Miscommunication, Lack of understanding of the drill objectives	3L	<ul style="list-style-type: none"> - Use clear, concise language in briefings - Provide written instructions - Encourage questions to confirm understanding - Verify comprehension through feedback - Conduct pre-briefing meetings with team leaders - Use visual aids to enhance understanding - Reinforce the objectives of the drill - Record the briefing session for future reference - Ensure all team members are present - Outline consequences of not following procedure 	1L
3. Equipment Setup	Faulty equipment, Improper setup locations	3H	<ul style="list-style-type: none"> - Conduct safety checks on all equipment before use - Use checklists for equipment setup - Ensure equipment setup is supervised by qualified personnel - Test equipment functionality ahead of the drill - Clearly mark setup areas - Isolate power sources where applicable - Secure loose equipment to prevent accidents - Use signage to indicate setup areas 	2M
